

# To Supply Leftover Food to Poor

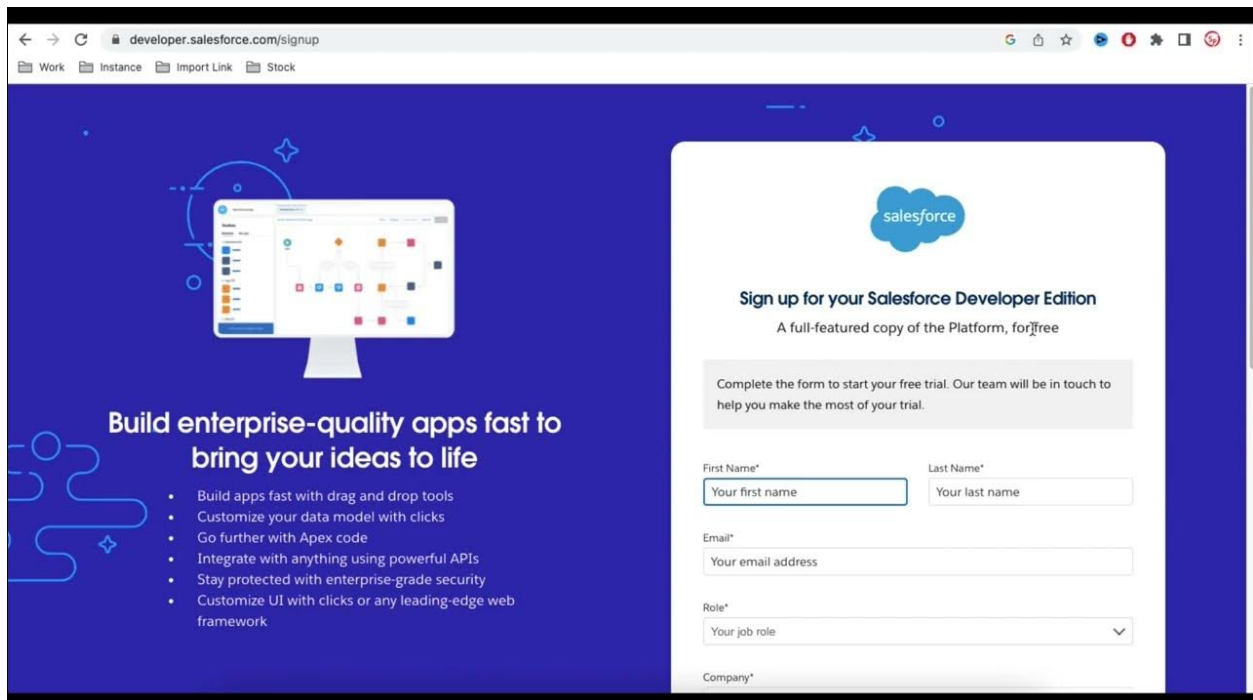

Project By,  
Dadiga Vasavi Priya  
21bq1a0543@vvit.net

This Salesforce-based project aims to create an efficient system for collecting and distributing leftover food from restaurants, events, and households to underprivileged communities. The platform will connect food donors (restaurants, event organizers, and households) with NGOs and volunteer organizations responsible for distributing food to the needy. It will ensure that food is collected and delivered efficiently, reducing waste while addressing hunger.

# To Supply Leftover Food to Poor Setup Guide

## 1. Creating Developer Account

1. Visit Salesforce Developer Signup.

The screenshot shows the Salesforce Developer Edition signup page. The page has a dark blue background with a white sidebar on the left containing navigation links: Work, Instance, Import Link, and Stock. The main content area is white and features the Salesforce logo at the top. Below the logo, the text reads "Sign up for your Salesforce Developer Edition" and "A full-featured copy of the Platform, for free". A message states: "Complete the form to start your free trial. Our team will be in touch to help you make the most of your trial." The form includes fields for First Name\*, Last Name\*, Email\*, and Role\*. The Role\* field is a dropdown menu with "Your job role" selected. There is also a Company\* field at the bottom. On the left side of the page, there is a section titled "Build enterprise-quality apps fast to bring your ideas to life" with a list of bullet points: "Build apps fast with drag and drop tools", "Customize your data model with clicks", "Go further with Apex code", "Integrate with anything using powerful APIs", "Stay protected with enterprise-grade security", and "Customize UI with clicks or any leading-edge web framework".
